

By Mado

EXOPOLITICS STUDY THE RELATIONSHIP BETWEEN HUMAN BEINGS AND EXTRATERRESTRIALS (ET) or other non-human intelligent beings. It is a subject of prime importance since the origin of humanity, its religions, history, technology, politics and future cannot be clearly understood without first considering exopolitics. Defining the scope of the phenomenon is difficult since, for in the past sixty years, the media has imprisoned the subject within walls of ridicule.

Mado.

MEANWHILE, THE GOVERNMENT HAS KEPT anything that was remotely related to exopolitics hidden under a thick veil of secrecy

A few numbers will help us realize the amplitude of the phenomenon. USA seems to be the country most affected by UFO sightings. According to ICAR (International Community for Alien Research), 50 percent of US citizens believe that Earth has been and is still visited by ET, 15 percent have seen UFO in the sky from close enough to be able to give construction details, and 2 percent (5 millions!) were probably abducted by ET. The same scenario repeats itself in all countries, usually with lower ratios. However, everywhere in the world, almost 100 percent of the population believe that their own government has been lying about the subject. What information is

being kept away from us under this insidious concealment and disinformation?

Any person willing to study exopolitics open-mindedly will quickly discover an incredible amount of facts – documents, witnesses, photographs, videos, skeletons, architecture, paintings, technologies, and so on – that cannot be explained otherwise. The incredible performances of UFO have often taken the breath away from military and civilian pilots, astronauts, and engineers. These UFO appear and disappear out of nowhere, travel at incredible speeds and make 90 degree angles without slowing down, an impossible feat according to the law of inertia. One cannot study the following phenomena without considering a possible extraterrestrial origin: crop circles, cattle mutilations, certain human

implants, some human abductions during which ET and human beings went directly through walls or travelled outside of the usual space and time limits.

Since the amount of undeniable proof has been steadily increasing, why do most governments, including USA's, still refuse to publicly acknowledge the UFO-ET phenomenon? Why do other governments (France, Great Britain, Canada, Mexico, Brazil and Denmark) open up only a portion of their previously "cleansed" files? When one digs deeper, the reason becomes obvious. Most of the military and paramilitary groups involved in exopolitics have been using threats, torture, drugs (traffic and experimentation), mind control, abductions, money laundering and murder to keep the truth from coming out. The stories published by whistleblowers have been purposefully riddled with disinformation to such an extent that it is presently impossible to study exopolitics without falling into pits filled with lies and deceit.

Meanwhile, leisure media (movies, TV series, video games) and New Age spirituality manipulate our exopolitical belief system with breathtaking ability. In some scenarios, good ET will come and save us when things start to heat up on Earth. In other scenarios, bad ET are ready to invade us, or have been deviously controlling us for millennia. Good or bad, extraterrestrials are always presented as being far more intelligent, knowledgeable, and powerful than humans. Humanity remains the poor victim who is forever searching for a culprit to point at and a saviour to pray to. For some, the future world government will save them from an invasion of cruel and scheming ET. For others, wise and saintly ET will insure that the scheming secret elite in charge of the military-industrial-extraterrestrial complex will not jeopardize human survival on our planet.

It is time to examine the exopolitical scene with a personocratic¹ vision. Human beings have never been victims but creators. As long as a human being remains unconscious of her creative nature, she cannot climb out of the hell-on-earth she has created. To raise her consciousness, she absolutely needs to understand the exopolitical scene, as it touches upon all aspects of her daily life.

EXOPOLITICS AND HISTORY

Many artefacts prove that extremely advanced civilizations existed on Earth thousands of years ago, although we cannot be sure that they were human-made. Let us examine a few ex-

amples. Ancient submerged cities were found near Bimini and Yonaguni that are possibly tens of thousands of years old. Some ancient architectural feats would be very difficult, if not impossible, to imitate with modern technology, due to their weight or complexity: cromlechs (Stonehenge), sculptures (Easter Island), pyramids (Egyptian, Mayan).

Let us mention old castle walls that were probably vitrified because of a nuclear explosion (Scotland), ancient and extremely precise maps (Piri Reis, 1513), dinosaurs killed by lasers, a 500,000 year old battery, geoglyphs such as the Nazca lines in Peru, and a thousand other proofs. It quickly becomes obvious that ancient and extremely advanced civilizations – human or/and non-human – preceded our own.

To discover the identity of our pre-modern era builders and inventors, we must leaf through the pages of various religious texts: Bible, Koran, Torah, Vedas. These are filled with stories of UFO, which are described as burning bushes, chariots of fire, wheels of light, *vimanas*. Their pilots are portrayed as angels coming down from heaven or demons suddenly springing up from the fires of hell. Several medieval paintings show UFO, some with ET on board. It seems obvious that at least some of the "gods" of old and other mythical characters who have inspired religions and spiritualities were extraterrestrial in origin.

EXTRATERRESTRIALS CREATED HUMAN BEINGS

Sumerian tablets and biblical accounts describe the creation of human beings by "creator gods" bearing names such as Annunaki (Sumerian) or Elohim (Hebrew). According to these texts and many others, we can conclude that a human being is a genetically modified organism (GMO) probably made up of the genes of a terrestrial hominid, *Homo erectus*, to which were added gene segments of several extraterrestrial species: reptilians (demons), Aryan-types (angels) and others. Alex Collier mentions 22 different genomes used to create the human DNA. By using different combinations, our ET "creator gods" were able to invent several human races on Earth. Some disappeared (Neanderthal), possibly decimated by their creators who wished to favour those races that best suited their needs. Among them were also found giant races – Nephilim, Rephaim, Anakim. These are mentioned in the Bible and their skeletons have been found in many places on the planet (China, USA, India). Our "divine" geneticists invented the *Homo sapiens* GMO for two reasons. First, they

were to be used as slaves in mines because extraterrestrial workers were ill-adapted to life on Earth. Secondly, human beings were meant to serve as cattle² for their masters, who needed food that was adapted to their genetic makeup in Earth's difficult environment.

These genetic experiments probably took place about 200,000 years ago, with several subsequent improvements. An extremely rapid evolution followed, as human civilisations bloomed and collapsed in succession. Hunter-gatherers became farmers and small settlements blossomed into various large cities in Sumer, Egypt, India and Mesoamerica. Some of the oldest official historical records date back 5000 years and demonstrate the presence of an advanced Sumerian civilisation in such fields as religion, architecture, art, politics, law, money and education. Domesticated plants and animals were surely developed through advanced genetic manipulations by our extraterrestrial geneticists, in order to sustain their agricultural needs on Earth and that of their human slaves.

All ancient human civilisations on Earth mention tall and powerful creator gods, often with partially animal bodies that are pictured as insect-like, reptilian, bird-like or mammalian. Some of these are represented in ancient Egyptian culture. Many were described as large snakes, often with legs and sometimes wings, corroborating the legends about dragons that are found on all continents. Did human beings kill off all the descendants of these extraterrestrial geneticists, like St. George did to his mythical dragon? Human beings may have become violent and smart enough that our extraterrestrial geneticists decided to leave the planet or remain in partial hiding in out-of-reach places, usually underground. Is this the source of legends mentioning demons living in a mysterious underground hell?

DIFFERENT TYPES OF INTELLIGENT BEINGS

Several types of intelligent non-human beings (INHB) can be encountered on Earth. According to whistleblower Clifford Stone, 57 different species are known by the US army. Before the creation of human beings, some intelligent non-human beings lived on Earth or visited our planet on a regular basis. To help our understanding of the phenomenon, it is easier to divide these various intelligent non-human beings into four groups, according to their origin and our capacity to perceive their presence. For a quick overview, check the square below.

The 57 species mentioned earlier belong to two groups of intelligent non-human beings: extraterrestrials (ET) and intraterrestrials (IT). The most common category is the typical **extraterrestrial** travelling inside various types of UFO and coming from elsewhere. All the ET who are able to reach our planet can manipulate the space-time continuum and get to or leave Earth very quickly. They may arrive from another planet in our solar system (Venus, Mars), a different star system within our galaxy (Vega, Rigel), or a distant galaxy (Andromeda, Sombrero).

TYPES OF INTELLIGENT BEINGS (from a human perspective)

- 1 – human beings (HB);
- 2 – intelligent non-human beings (INHB):
 - a) extraterrestrials (ET),
 - b) intraterrestrials (IT),
 - c) extrasensorials (ES),
 - d) hybrid human beings (HHB).

The second category is made up of **intraterrestrials** (IT). These live on Earth, usually underground or underwater. Some inhabit huge caves (100 to 200 miles deep) while others live underneath army bases where they work with human beings on secret projects (Los Alamos, Dulce). Several species of in-

Hollow Earth.

traterrestrials travel with UFO. A few persons (Amiral Byrd, Olaf Jansen, modern pilots) mention that the Earth is hollow and inhabited by various races of IT living in large, technologically advanced cities. The Earth crust is approximately 821 miles thick and there are huge openings at both poles.

Much more mysterious, the third category of intelligent non-human beings represents what I have chosen to call **extrasensorials** (ES). The main problem comes from the fact that human beings use five very limited senses – sight, hearing, taste, smell and touch – that give them access to about 0.1 percent of their environment, according to physicist Giuliana Conforto. Consequently, many types of intelligent non-human beings are difficult to identify and contact unless one has extrasensory abilities. Certain drugs, technologies, dowsing, sacred geometry and magical ceremonies allow us to perceive their presence. These are beings from the supraphysical, vital (emotional, astral) or mental (spiritual) realms. Some can modify their appearance and pretend to be ET, IT, demons, angels, saints or a dead parent in order to better manipulate us. Power-hungry extrasensorials can easily influence us without our knowledge by suggesting ideas in our mind, awakening vital desires, and enhancing physical habits.

The fourth category requires more detailed explanations. According to many sources, at least one reptilian race existed on Earth before human beings were genetically engineered. These first ones started to interact with humanity. Some male reptilians mated with human females and created hybrid descendants. As with donkeys and horses, which are two different species, it is possible to have a hybrid human being-intelligent non-human being lineage. The offsprings are often sterile or reproduce with difficulty. This race of **hybrid human beings** still exists today. The purest specimens are all members the blue blood families that presently rule the world, such as royalty and important members of government.

tal, financial, banking, corporative, media, artistic, musical, sportive, and scientific spheres. 100 percent of the elite presently organizing the New World Order is made up of hybrid human beings. Their genetic code allows them to be telepathically controlled by reptilian intelligent non-human beings. Researchers such as David Icke have clearly demon-

strated that people such as Elizabeth II, Bush father and son, Obama and the like are literally possessed by reptilian beings. Some types of intelligent non-human beings are then able to control what happens on Earth by subtly influencing the top members of the human herd hierarchy.

ET, IT and some extrasensorials live for a very long time and their civilisations have existed for millions of years. Most intelligent non-human beings reproduce naturally or artificially; they have physical, technological, vital and mental powers that may seem superhuman and allow them to travel through walls, appear and disappear at will, communicate by telepathy, paralyze human beings, displace objects, and so on.

Realise that each type of intelligent non-human being has its own agenda, which either facilitates our own survival or hinders it. In the first case, we call them “good” or “benevolent”. In the second case, they are classified as “evil” or “malevolent”. Historically, the most cruel and ugly intelligent non-human beings – according to human standards – were classified by religions as being demons (devils, djinns, *asura*) and often consisted of reptilian, insect-like or other non-human-looking beings. Beautiful, human-like and sometimes wise ET and IT were classified as angels and archangels (*deva*). These humanoid races were often taller than humans and some had blond hair, blue eyes, white skin and, occasionally, a luminous body.

Several groups of ET and IT have joined hands (and claws?) with the human world elite to form what Michael Salla calls the military-industrial-extraterrestrial complex. This military-industrial-extraterrestrial complex has

Aryan type INHB.

been planning a New World Order based on a microchipped population that is meant to become the enslaved herd of a ruling elite that is entirely made up of hybrid human beings. These last ones would be telepathically controlled (possessed) by power-hungry extrasensorials. Other groups of intelligent non-human beings claim to be benevolent and offer to help humanity escape from this long-planned agenda. They visit some of us (Billy Myer) in their UFO or contact us telepathically (channelling) to offer their recommendations.

Be conscious that this division between good and bad intelligent non-human beings is strictly a creation in our image and likeness. This duality exists inside of us, human beings, and we project it onto other beings. No intelligent non-human being or human being is ever good or bad. They and we all act according to our level of consciousness. The problem is that I still perceive myself as a victim, a powerless sheep in need of a shepherd (government, good intelligent non-human beings, external god) that will protect me from the big bad wolf (bad intelligent non-human beings). Basically, it is an identity crisis.

WHO IS “HOMO SAPIENS”?

The amount of disinformation about ET, IT, and extrasensorials is mind boggling, but the one that exists concerning the true nature of human beings has even more severe repercussions. Indeed, who are we? Minerals, plants, animals, human beings, ET, IT, extrasensorials and hybrid human beings are all made up of one single creative vibration that we choose here to call Idessa³. This universal conscience represents all that is unmanifested (spirit) and manifested (matter). Three increasingly denser vibratory realms are used to express matter: mental, vital (emotional, astral) and physical. The thousands of types of intelligent beings that exist are made up of various combinations of these material vibrations.

Each living species in the cosmos owns a **collective soul**, whose role is to govern it and ensure its survival. Rocks, plants, animals, ET and IT all have collective souls, along with the extrasensorials who have supraphysical bodies (physical vibrations that most human beings are unable to perceive). human beings are different for one important reason. Their body is a GMO made up of an extreme genetic mixture. When ET created them out of a mixture of 22 different species, human beings found themselves connected to 22 different collective souls, each with its own agenda. Some of these collective souls had extremely low, “demonic” vibrations, while others had very high “angelic” frequencies. human beings were gradually forced to shut off these conflicting voices and to live without any collective species soul. Instead, human beings started listening to the embryonic **individual soul** that was present in their body. That is how a new level of consciousness began to evolve.

From life to life, this soul spark grew and became what Aurobindo and The Mother (Mirra Alfassa) call a “psychic being”. According to them, planet Earth is the only place in the universe where the “individual soul” experience is tak-

ing place, and humanity is presently the only species that is able to fulfil the goal of this long-planned agenda.

The development of this individual soul usually takes thousands of years and hundreds of human lives. In the meantime, a human being cannot be left on her own, without a guide connected to the world of Spirit, the highest idessic vibration. As the messages from her individual soul are still very difficult to hear, the human mind develops an **ego** that serves as a temporary regent for a single life. Each new incarnation ends when the body dies of fear and exhaustion. The physical body dissolves, followed by the vital body (emotional, astral), then the mental body (often mistakenly called the “spiritual” body). The ego usually dissolves with them. All that is left is the individual soul, which creates another body for yet another life, so that it can continue its evolution in matter until it becomes a full-fledged “psychic being”.

Homo sapiens as we know it is on the verge of becoming extinct. Humanity is simply a transition between animality and idessity, between the government of the mind and the governance of the soul. Inside each human being, a brand new idessic being is being formed. Basically, we are pregnant with our next body, as the fish was pregnant with the salamander. The behaviour of this new idessic being will not be based on intelligence – the mind – but on unlimited idessic attributes – the soul. This transition is almost over. **No human being will survive this transformation.**

PERSONOCRATIA'S PATH

From the ashes of the old *Homo sapiens* will actually emerge two different species. The first one will be made up of who refuse to change and to let go of the outmoded human behaviour. These human beings will simply die and reincarnate into a more harmonious species much like that of dolphins or whales. Some have already named it *Homo luminous*. This species will eventually give rise to what many prophets describe as the Golden Age. It will be the end of duality, fear and war. Will it be on Earth or elsewhere? It is hard to know.

The second species, even more mysterious, corresponds to the aim of the whole *Homo sapiens* experiment and, possibly, the ultimate purpose of the entire evolution of consciousness in matter up to now. It represents Aurobindo's “supramental being” and Teilhard de Chardin's “Omega Man”. Ghis calls it the “idessic being” and symbolises it as a winged mare, as it can run on the land (matter) and fly in the air (spirit). This new being will appear on Earth very soon. It will no longer be an intelligent animal. No scientific species name will be given to it. In this **idessic being**, the physical body, the soul and the spirit will have fused into a triunal being (three in one). The body will be made of a new matter, denser than diamond and lighter than gas, thus uniting the duality matter-spirit and creating a new, third position: the idessic being. No longer gendered, “*It*” will express all the attributes of the Supreme Being, Idessa, on an individual basis: omnipotence, immortality, omniscience, pure love, joy and peace.

The whole purpose of the *Homo sapiens* experiment is the birth of this idessic being. No *Homo luminous* and no Golden

Age can exist before its manifestation. The hell-on-earth we are presently experimenting will not cease until this aim has been reached. How can it be achieved? A critical mass of human beings needs to consciously make a transfer of power from the government of ego to the governance of soul. This means giving priority to the feminine principle (spirit) over the masculine (matter). That's the key! That allows them to clearly hear the messages from their individual souls and use their **free will** to obey its instructions.

Ghis calls such conscious human beings **personocratias**. They remember who they are, Idessa, and behave as such in their daily life. They are aware that their souls are connected at all times with the world of truth and know exactly the action they need to take at each moment. They know that their body is transforming into a totally new being who will no longer need to breathe, eat, reproduce or rely on any other basic animal requirements. Personocratias work purposefully and diligently to dissolve their egos and give complete free rein to their souls. The instructions vary from one soul to the next, as this is an individual process. When a critical mass of Personocratias is reached, the whole universe will be affected. Idessic life will become a novel state in matter, a new expression of Idessa that will be both individual and collective: the One and the All.

COMPARING HUMAN BEINGS AND OTHER INTELLIGENT BEINGS

Now that we know the purpose of humanity, we can look at the New World Order, the state of our planet, the unrelenting violence and cruelty of human beings and some ET and IT in a new light. Let us examine some old belief systems.

SUPPOSITION #1: *Human beings are the only humanoids in the universe. The other intelligent species (ET, IT, extrasensorials) are very different in appearance.*

TRUTH: Several species of ET and IT are human-looking. Here are some places where they are found: Sirius A and B, Nibiru, Vega, Lyra, Pleiades, Rigel, Procyon, Tau Ceti, Andromeda, Umma, Alpha Centauri. Some look so much like human beings that we can hardly tell the difference. Others are giants or have blue, white, red, green or yellow skin. Some temporarily or permanently inhabit hidden bases on Earth and use their similar appearance to mix with local human populations. That might explain historical accounts of beings such as Krishna, Saint-Germain, Jesus or other superhuman "masters". However, human beings are the only ones to own an individual soul. This explains their very different behaviour.

SUPPOSITION #2: *Human beings are not as intelligent and wise as intelligent non-human beings because they are a new,*

less-evolved species in dire need of guidance. They cannot function by themselves.

TRUTH: human beings are the only ones with an individual soul. They have a direct and personal contact with Idessa, the unique creative vibration. This allows them to be more conscious – they can more easily tell true from false. They are said to have **free will**. They can choose to listen to their individual soul bathing in the supramental world of truth, outside of all space-time limits, or to follow the ego's collective program in the world of illusion, with its restrictive natural, religious, and political laws. All intelligent non-human beings are guided by collective souls. They are more limited than human beings because their soul can only express itself in a collective manner. At the individual level, they can only function through limitative mental, vital and physical expressions that are typical of the world of fear and death.

SUPPOSITION #3: *Human beings are less evolved technologically. Advanced knowledge offered by ET is absolutely necessary to save our planet and our species.*

TRUTH: We are not facing a technological or environmental crisis, but an evolutive one. The future of humanity does not depend on more advanced technologies. We need to abandon the old *Homo sapiens* to liberate the new idessic species imprisoned inside of us.

SUPPOSITION #4: *Intelligent non-human beings are more evolved spiritually. They live in peace and love and can guide human beings so that Earth becomes a paradise.*

TRUTH: Intelligent non-human beings enjoy the false peace and codependant love typical of a herd-like **hierarchy**. The law of the fittest has become the law of the most intelligent and technologically advanced. It is easy for intelligent non-human beings to be generous and pacific when they can quickly dominate any rebellious member of the herd. Depending on the species, the most powerful impose their will using physical force (muscles, weapons), vital power (black magic) or mental strength (white magic). Each time, the weakest cannot do what he would like. Disorder ensues and death becomes inevitable. When a human being chooses the personocratic path, he works by **contagion**. By listening to her soul at all times, its psychic vibrations spread throughout her whole body. This frequency of true power, knowledge, peace, joy and love imposes a new order in her body and all of surrounding matter.

SUPPOSITION #5: *The other intelligent species in the cosmos all had to go through the same evolution stages as humanity before finally being granted access to the Cosmic Community. When human beings become more intelligent and wise, we will finally be able to join them.*

TRUTH: The purpose of humanity was *never* to join a Cosmic Community made up of the union of various types of intelligent and wise intelligent non-human beings. On the contrary, it is our duty to leave the old government of the mind for the new governance of the soul. Humanity is simply a transitory species between the first and the last.

SUPPOSITION #6: *Since the creation of humanity, genetic experimentation to create new human beings or modify existing human DNA has stopped.*

TRUTH: Certain IT, often guided by extrasensorials, have continued their genetic experiments on Earth. Some experimentation is done in cooperation with human scientists. The hybrid human elite also have projects of their own. In several US army bases, witnesses have reported seeing humans (men, women, and children) in cages and a whole array of partially human “beasts”. Promising embryos are raised in artificial wombs or implanted in women who are either kept in cages in situ or abducted and later released, with their memories modified. The hybrids produced in such ways are used as an elite private force of super-soldiers or to fill various positions of power within society. Cloning important leaders allows the hybrid human being ruling elite to replace non-cooperative leaders by an identical double totally under the control of the military-industrial-extraterrestrial complex. Basically, our leaders are not entirely human. We cannot expect them to understand what is going on with human evolution. Hybrid human beings can only act according to their limited view of reality, which is greatly influenced by the hive mentality characteristic of their genetic make-up.

WHY DO THEY COME ON EARTH?

Intelligent non-human beings have been watching us, and many have been interacting with us for millenia. Some alien scientists have been studying members of the same human and hybrid human being families from one generation to the next, through the use of implants and abductions. The extraterrestrial geneticists who created us probably did not realize the capital role the human species would eventually play in the idessic evolution. Their collective soul was guiding them and knew the transitional role of human beings, but not the individual ET getting the work done.

With time, intelligent non-human beings noticed that the evolution of human beings was as fast as it was dramatic. They had never seen a species more violent, cruel, loving, artistic, musical, poetic... This strange new species called *Homo sapiens* was expressing the most extreme behaviour between its members and toward the rest of creation. Its individualistic tendencies were totally opposed to the survival of the species and the hive mentality typical of all animals, intelligent or otherwise. Worse still, this individualism seemed to increase exponentially with time! Many types of intelligent non-human beings flocked to observe us. Some decided to try and help us (service-to-others types), and others, to use us for their own purposes (service-to-self types). Today, we still remain an enigmatic species for most of them.

Each intelligent non-human being species visits the Earth for different reasons. Some reptilian intraterrestrials lived on Earth long before we were created. They have been observing us and manipulating us subtly for thousands of years, making sure that the Earth will stay viable for them. Another, more advanced species of giant humanoids, the Annunaki, were the ones who came to perform genetic experiments and introduce human beings on Earth, much to the dismay of Earth's other intelligent inhabitants.

Certain intelligent non-human beings come on Earth to

feed on human being physically (muscles, organs, blood, often from children) or emotionally (vital energy, also called *prana* or *chi*). Others want to take some of the natural resources found on Earth (water, minerals, DNA from plants, animals or human beings). Cosmic psychologists wish to study us, and cosmic teachers – to enlighten us in the direction they deem best for us. Some intelligent non-human beings understand that we are on the verge of a quantum leap in consciousness. They have looked into the future and found that at some point, all goes blank (around 2012?). Time stops! And the problem seems to come from Earth! Consequently, some are attempting to (1) stop our evolution, others, to (2) observe what will happen and still others, to (3) assist us as best as they can.

No intelligent non-human being can stop the human purpose from being fulfilled some day. Most do not realize that they can no longer help us and that those who attempt to stop us can only accelerate the process. Nothing stop Idessa! The Apocalypse, the “uncovering” is well under way. We have almost reached the crucial point where the adventure becomes totally individual and each one of us must perform her internal transformation alone. Those who refuse to change and to let go of the outmoded human behaviour will simply die and reincarnate into the *Homo luminous* mentioned earlier.

HOW SHOULD I BEHAVE WITH THEM?

Now that I finally understand the human agenda, it is time to stop putting intelligent non-human beings on a pedestal, should it be spiritual or scientific. Each intelligent species in the cosmos fulfils its own purpose in the universal idessic dance, guided by her collective soul. Each human being has her own purpose, which is totally different and steered by her individual soul.

However, some pieces of the puzzle still need to be addressed. Since at least 1930, and possibly before, certain ET have offered precise technological information to a small elite of human beings. The military-industrial complex first mentioned by Eisenhower truly exists, but he deliberately forgot to mention the third player: ET. This past US president surely knew of their existence since he had met on several instances with at least two ET species and made deals with one of them in 1954. Before him, other leaders, such as Hitler, have done the same.

Because of reverse engineering of crashed UFO and alien vehicles offered by ET, the hybrid human being elite ruling over the military-industrial-extraterrestrial complex now owns its own fleets of UFO. These will be used to help the secret elite establish the New World Order more efficiently. The military-industrial-extraterrestrial complex is also responsible for a good part of human being abductions. They kidnap those who were previously abducted by ET because they are trying to understand the reason for the ET's intensive multi-generational studies. On their side, ET are desperately attempting to understand and harness the incredible power of individual souls. Basically, they want to have access to human beings' potential for unlimited powers without going through the human incarnation process, as this would mean loosing

ABOUT THE AUTHOR

Since her best friend's probable ET abduction when she was fourteen, Mado has been reading everything she could find about the subject. She discovered that the New World Order was not only related to all the spheres of society, but was also deeply linked to exopolitics. She finally managed to connect all the dots when she discovered Ghis' personocratic approach. Her excitement grew when she realized that Aurobindo and The Mother had been on the same path and explained the coming of the idessic being in great detail. She now spends her time writing with Ghis the popular series called *Personocratia's Booklets*. She can be reached at this email: personocratia101@gmail.com

FOOTNOTES

¹ Personocracy – the state of consciousness typical of a human being holding full power over her own life. It is possible only when a person has given priority to the soul over the ego.

² Adam means "cattle" in Sumerian and Akkadian.

³ Idessa – the name of the Supreme Being inherent to all that exists. She is both the Creative Spirit and the created matter. The word was coined by Ghis from the words "identity" (*id*) and "goddess" (*-dess*). Even if Idessa is both feminine and masculine, the final "a" is meant to feminize the word so as to respect the order of creation: *feminine principle* (spirit/soul) → *masculine principle* (mental, vital and physical matter).

all mental and technological powers, and their long lifespan. ET are trying to avoid the need to go back to square one and to suffer through a continuous series of human lives that can only be experienced as hell-on-earth.

In the coming years, the military-industrial-extraterrestrial complex has planned a false worldwide extraterrestrial invasion, using its secret fleets of UFO. This event will probably be preceded by (1) a global economic crisis, (2) a global pandemic, and (3) a third world war. They may also simulate the arrival of a holographic Christ-like saviour, using another type of secret technology. This scenario is called the **Blue Beam Project**. The combination of all these events will trigger the establishment of a New World Order, combining both the spiritual (religion) and temporal (politics) aspects into the hands of a single world dictator. When we think about the incredible amount of disinformation surrounding the exopolitical phenomenon, it becomes obvious that the hybrid elite now running the world in secret will use this master card at the very end of its conspirational poker game.

CONCLUSION

When we study the innumerable reports from human beings who have been in contact with intelligent non-human beings, it becomes obvious that the intelligent beings who visit us and possess physical bodies are all mortal, even if most live for a very long time. They also eat physical, vital or mental food. Most need to reproduce, wear clothes and use technological tools to travel around and accomplish various tasks. All believe in an external god and universal/cosmic laws. Some of them respect these laws and others choose to break them. Even if they travel in time (past and future), they remain captive of the illusory world of space-time, which is based on fear and death. Thus, we can conclude that intelligent non-human beings belong to two large categories of beings. They are either **superbly intelligent animals** governed by a collective soul, or **disincarnate beings** without a physical body (some extrasensorials). A third possibility would be to have a **combination** of both: animal-bodied ET and IT who are possessed and ruled by extrasensorials. Remember that our hybrid human being ruling elite are also controlled by extrasensorials. Most human beings are also affected by the subtle power of extrasensorials. Their influence can be stopped, but we must first be aware of the problem.

Human beings are also intelligent animals, but each one is governed by an individual soul, allowing to create the passage between animality and idessity. From the very cells of human beings will emerge idessic beings: Idessa individualized. In such idessic bodies, everything becomes possible and all laws fall apart. This unique event is now under intense preparation inside all human beings who accept to place their bodies totally under the governance of their soul. Each of these courageous human beings follow a pathless path, where nothing from the past or from other planets, star systems, galaxies or any parallel universe can guide them.

It is now clear that intelligent non-human beings represent our evolutive past. Thousands of years ago, the bravest ones among them chose to start the long process of consecutive incarnations inside human bodies. A lot of courage was needed since incarnating as a *Homo sapiens* means accepting to be born totally unconscious and to live a life of intense suffering. The ceaseless physical torture, emotional distress and mental torment represent the diving boards allowing us to leap into the unknown world of the new species. Worse still, each human being needs to discover an individual path to idessic life in matter.

Evolution always happens inside bodies. In the past, these bodies were unconscious of the reason for the change from one form to another. Fish did not choose wilfully to become salamanders. Most probably, there was a simple switch from the voice of one collective soul to the next. For human beings, it is an entirely new procedure, based on conscious free will. Those who dare work hard to dissolve the old survival ego. **No intelligent non-human being can help them in any way** – only their soul knows the way to succeed.

If I choose the personocratic path, I must (1) call and listen to my own individual soul, (2) give her free rein to run my life, and (3) surrender to her requests. The greatest difficulty is to perceive the difference between my ego's voice, which insists on following the animal program and on insuring the survival of the species, and that of my soul, which follows its individual path and aspires to fulfil its long-awaited plan.

The issue is collective, but the answer, individual. One thing is sure: **nothing can stop Idessa**. It is truly the end of *Homo sapiens* and the beginning of a new ways of being. I can decide to participate in the process or to hang on to an outmoded program. Do or die! ■
