

Personocratia's Path

THROW YOUR TELEVISION OUT THE WINDOW!

Media Control

Schooling plays a big role in programming the population, but the most potent and prevalent educational tools are the mass media. These are devised to reach a large audience via the **broadcasting of information** through natural means (spoken or written language, posters) or technological ones (radio, television, cinema, the Internet). With time, the elite controlled all the important mass media and were able to dictate its contents.

The trick is easy. All the elite need to do is repeat the **same simplistic lies** in all the media and the population will believe them without a doubt. This is how lies acquire an irresistible aura of credibility. A specialist of mass brainwashing, L. Wolfe, explains it further: "As Tavistock's researchers showed, it was important that the victims of mass brainwashing not be aware that their environment was being controlled; there should thus be a vast number of sources for information, whose messages could be varied slightly, so as to mask the sense of external control." Wolfe specified that the contents had to be entertaining and leave the impression that the person always had the choice between various messages and sources. Therefore, the same repetitive information remains hidden behind different and appealing guises.

Tavistock

Around 1920, the **Tavistock Institute** became the centre for the study of human behaviour, mind control, propaganda, and manipulation. Created in London, it spread overseas with the financial help of the Rockefeller Foundation. Its influence increased when it combined the study of anthropology, economy, organizations, politics, psychology, psychoanalysis, psychiatry, and sociology. For example, Tavistock organized social phenomena such as the hippie counterculture and the use of mind-altering drugs. Its primary objectives were and still remain the organization of cultural changes through the imposition of chaos and the occult manipulation of special groups. With a 2012 budget of around 6 billion USD, it is now made up of 10 institutions, 400 subsidiary companies, and 3,000 study groups. In secret, Tavistock guides powerful multinationals such as the Rand Corp. (media, politics, commerce, health, education, defence), the Mitre Corp. (defence, revenue, national security), the Standford and Hudson Institutes, etc.

After 90 years of research, Tavistock's main discovery concerns **child sexuality**. This has a great influence on the development of personality. Early sex stimulation produces adults whose emotional development is similar to that of a neurotic child. Their second discovery is related to stress. Tavistock researchers found out that people under **controlled stress** became more infantile and gave up strongly held beliefs under group pressure to conform to popular opinion. That explains why the mass media insist so much on sex, violence, and fear-inducing messages. We are being turned into scared, submissive children who try to evade from their daily stress through emotional masturbation – television, radio, CDs, DVDs, movies, and video games.

Television

Westerners spend **four hours a day**, the equivalent of two months a year or nine years in a lifetime, being hypnotized by a television screen, without being conscious of the effects this activity has on them. They have stopped interacting with friends, neighbours, community, and even family. Their free time is spent in imaginary relationships with fictitious characters on the screen.

A few US **statistics** will show us the extent of the phenomenon: 99 % of households own at least one TV; there are 2.24 TVs per family; the television remains open 7 hours a day; 66 % eat in front of their television sets. The addiction starts right after birth, since 30 % of kids who are 0 to 1 year old and 47 % of the 5 to 8 year-olds have televisions in their rooms. A typical US child spends 3.5 minutes per week in meaningful conversation with a parent, but 1680 minutes per week in front of TV. Is this why television is called the "one-eyed babysitter"? By the time they are 65, most people have seen 2,000,000 TV ads. This phenomenon is becoming global.

The earth population has become addicted to television. If one decides to quit the TV habit, she experiences withdrawal symptoms that are as severe as those related to drug or alcohol abuse. There is a direct relationship between **child obesity** – which is severe for 11 % of 6 to 17 year olds in US – and advertisements, since the most popular types of commercials are related to junk food. A study counted more than 200 junk food ads during four hours of cartoons on Saturday morning US television.

When compared with radio listening, the good side of television is that there are **pictures**. The more there are to accompany a special news report, the more tangible it will seem and the lesser the chance of people questioning its accuracy. Media expert Hal Becker once said: "I know the secret of making the average American believe anything I want him to. Just let me control television...You put something on the television and it becomes reality. If the world outside the TV set contradicts the images, people start trying to change the world to make it like the TV set images." ⇒

Family Life in the 21st Century

Personocratia, contd.

How can the elite succeed in reaching full control of television? Through government control! Politicians vote and impose laws that favour large TV stations over smaller ones. Better still, most countries have their own sanitized and free State television station.

Mass Hypnosis and Mass Violence

Tavistock hastened to study the effects of television on human behaviour as early as the forties. Its researchers discovered that 30 seconds after one starts watching TV, the brain automatically begins to produce alpha waves, a modified state of consciousness. The viewer goes into a trance-like mode, a type of light **hypnosis**. All her attention is now concentrated on the screen, to the detriment of the rest of her environment. In this semi-conscious state, she becomes highly sensitive to the messages contained in the programs, especially the commercial ads. These are created especially for that purpose.

Television started becoming popular in the fifties. The elite have now accumulated more than 60 years of experience spread over three generations of viewers. The results are staggering. People are no longer logical. Their opinions and ideas come directly from television. The images validate what they hear. This filter of tele-opinions gets automatically superimposed over their daily reality. They have become passive members of a **plugged-in society**, and can no longer think, talk, or write logically. For them, images and knowledge are synonymous. They have become tele-idiot!

In Europe, **violence** on television is as critical as in America. Specialized stations such as Baby TV and Baby First broadcast programs for babies 24/7. When toddlers are one year old, they are already watching one hour of television a day. Statistics from 1988 showed that during one week of TV watching, viewers witness 670 murders, 15 rapes, 848 fights, 419 shootings or explosions, 11 armed robberies, 8 suicides, 32 hostage takings, 27 torture scenes, 9 defenestrations, 13 strangulations, and 11 war scenes. Nowadays, these types of event are not reserved to late hours. For example, Quebec's popular TQS station presented the movie *Terminator* at 6:30 pm – just in time for kids.

And It's Getting Worse!

Ever heard of Silent Sound Spread Spectrum or SSSS? It is a secret Pentagon psychotronics technology that has been operational since 1990. In 1991, it was used during the first Gulf War to force Iraqi troops to surrender en masse. Like compliant children, 200,000 men came out of their desert bunkers and fell to their knees before approaching US troops. The SSSS is now available in your neighbourhood – free of charge. It is carried to your brain with the use of several technologies, including chemtrails, cell towers and high definition digital television (HD-TV). In this way, the elite is aiming for total mind control to insure the compliance of its sheeple. Now you know why the government was so enthusiastic about letting us get digital converter boxes for a cheap price. After all, they want us to have access to high-quality television images. So thoughtful!

Big Brother goes even further with digital streaming video that allows any person with a personal computer linked to the Internet to access and watch popular television programs. This is available for free through companies such as Hulu. In this way, computer monitors and HD-TV screens broadcast SSSS and combine it with subliminally-pulsed images to bring about specific emotions and physical responses to all listeners or a selected type of DNA (Blacks, Orientals, women, etc.). If the elite has a sample of a person's DNA, it can even target selected individuals. Experimentation has shown that it is efficient – with various levels of efficiency – with about 85% of the population, while the remaining 15% seem immune to such mind control attempts.

What Should We Do?

What should we do now that we know? Well, truth is useless if we do not change our actions. Number one: throw the television out the window! Even without this new mind-control technology, the television has always been a "box of lies". Watching TV makes you stupid. All statistics are there to prove it. Forget the "good educational shows" that are simply there to misinform you. Number two: limit the time you spend in front of the computer and never, never watch TV shows from the Internet. Number three: do not use cell phones. Basically, it is like putting your head in the microwave oven and pushing the ON button. It is difficult to avoid chemtrails, but living a TV-free and cell-phone-free life is possible – and you get so much more time to read, think, meditate, exercise, cook, and keep good company. The elite has hijacked our brains with their technology, but we still have our free will. We can choose to use it or not to use it. Which one will you choose?

Personocratia*

More information is available about education and the media in Personocratia's Booklet #8, titled *EDUCATION - towards... Innate Knowledge*, which is still hot off the press. You can get it on the following site (www.personocratia.com) and watch videos on www.dianedares.com.

* **Personocratia:** The person who knows that she is the Supreme Creatrix incarnated in a body and who acts as such in her daily life.
