

VACCINATION 101

Why are vaccines useless, inefficient, and dangerous?

Vaccines are useless because . . .

- ✓ Natural microbes (yeasts, mycobacteria, bacteria, viruses) are **not enemies, but allies**. They help restore our body's health during the repair phase of a disease (Hamer's German New Medicine).
- ✓ We **create our own microbes** using the smallest particles of living matter that exist inside our bodies. These bear various names – microzyma (Béchamp), bions (Reich), somatids (Naessens).
- ✓ It is **absurd to give a disease** to a healthy person in order to prevent the same disease. It is like giving a child a small rape in order to prepare her/him for a possibly bigger rape later.

Vaccines are inefficient because . . .

- ✓ They **contain only artificial microbes** that have been weakened and/or genetically modified and play an aggressive rather than restorative role. They can 1) sensitize the person to the disease, 2) cause the disease itself, or 3) make the vaccinated person contagious to others.
- ✓ They **shock and exhaust the immune system** and stimulate the explosion of degenerative diseases such as AIDS and cancer. They systematically destroy human health.
- ✓ The efficiency of vaccines has **never been proven scientifically**. Their inefficiency becomes obvious with the need for repetitive inoculations and the appearance of diseases that vaccines were meant to prevent.

Vaccines are dangerous because . . .

- ✓ They are **extremely harmful**. Innumerable complications go from minor problems (allergies, eczema, otitis, asthma, behaviour and learning disabilities) to major disorders (autism, epilepsy, diabetes, arthritis, paralysis, leukemia, encephalitis, chronic fatigue, multiple sclerosis, fibromyalgia, Alzheimer, Ebola, foetal malformations, etc.) or even to death (e.g. SIDS). Accepting a vaccine is never a trivial decision.

In fact, a vaccine is a witch's brew made up of three types of ingredients:

- 1) A cocktail of microbes that have been artificially modified and often genetically recombined;
 - 2) A purulent culture fluid composed of animal cells (chicken, mouse, sheep, monkey, cow) and human cells (blood, aborted foetuses) that are cancerous and contaminated (viruses, prions);
 - 3) Preservatives and adjuvants that are in fact lethal poisons: Thimerosal (50 % mercury), aluminium, formaldehyde, squalene, monosodium glutamate (MSG), aspartame, silicone, polysorbates, sorbitol, and a long list of extremely harmful substances known for their brain and nerve toxicity.
- ✓ The content of vaccines is **Top Secret** and depends upon decisions taken by the military-industrial complex. The Ministry of Health of any country, the medical staff recommending and injecting them, and the person receiving them cannot find out their exact composition or their true purpose.

In fact, they serve as biological weapons of mass destruction for targeted populations – Blacks, Asians, the poor, Native Americans, handicapped, homosexuals, and inhabitants of territories with valuable resources. They have been developed as perfect eugenic (killing undesirables) and mind control tools.

- ✓ Vaccines are injected directly in the bloodstream, **without using the normal entranceways** of the body (nose, mouth, ears, skin), which serve as natural barriers against all types of microbial invasions.

All vaccines are useless, inefficient and dangerous, without exception!

Key Points Concerning Vaccination

- 1. The impending massive vaccination (2009)** is the direct result of a pseudo-pandemic of swine flu (A-H1N1) officially declared by the UN. The long-term ploy of the global elite is to reduce the world population to 500 millions. The new vaccines contain an extremely vicious cocktail of avian, swine and human influenza viruses, allowing contagious reactions from one species to the other and between humans. Liquid crystals and nano-sized microchips may have been included into the vaccines to facilitate mind control at a distance.
- 2. The basic theory on microbes is false.** Pasteur was an impostor, a cheat, and a liar. His experiments were falsified. The many scientists who have proven the beneficial role of microbes were ridiculed and punished. The funding for their research was stopped. They were hunted down; their equipment was destroyed; their documents were stolen; they were imprisoned. Any proof that went against the world elite's best interests was systematically crushed.
- 3. Vaccination is not a medical, but a political decision.** Its purpose is global population control. Vaccines can be used to eliminate undesirable individuals by repetitively weakening their health or by brutally killing them.
- 4. The WHO takes all vaccine-related decisions.** The World Health Organization is the UN's Ministry of Health. Its decisions are imposed by force to all governments through the use of propaganda, harassment, and threat.
- 5. Vaccines are biological weapons of mass destruction.** That is why research on vaccination first takes place in military laboratories. The first human guinea pigs are often soldiers and their families, who are unconscious of being used as expendable test subjects.
- 6. Qui bono? (Who benefits?) Vaccination brings in colossal profits to pharmaceutical companies and international banks.** To vaccinate their populations, governments must borrow huge sums. The public debt skyrockets while the international bankers increase their grip on all valuable resources.
- 7. Vaccination allows for the creation of new, uncontrollable diseases** that share in common their destructive action on the immune system (e.g. AIDS). They also induce permanent and hereditary modifications to the human genetic code. The long-term consequences of this cannot be anticipated.
- 8. Because of their neurotoxic effects, vaccines produce psychopaths,** generating social violence and crime. This situation causes political unrest and the reinforcement of military and police control. It opens the door to the full implementation of an already legalized martial law.
- 9. With the use of vaccination, the real socio-political problems remain hidden** while techno-scientific pseudo-solutions are proposed. These are so complicated that most people are unable to understand the faulty assumptions on which they rest. Most people react by trusting the authorities and submitting without question.
- 10. Vaccination keeps people powerless and dependant upon external authorities.** As long as I behave as a sheep, there will be a shepherd to abuse me. The role of any government has always been that of a shepherd with his flock. His only purpose is to shear the sheep until there is no more wool, and then to lead them to the slaughterhouse, while pretending that it is for their own good.

*In reality, I am omnipotent and immortal. I need no vaccines, no doctors, nor governments.
Compulsory vaccination is a gift that forces me to take the decision
to get out of fear, disease and death once and for all.*

Ghis (author of the book **The Medical Mafia**)
